

Shashank Shekhar

Software Developer | Full Stack Developer

Siwan, Bihar | +91 6207438536 | shashankshekhargiri2003@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

Education

Bachelor of Technology in Computer Science & Engineering , GLA University, Mathura	2023 – 2027
Intermediate , Vigyanand Kendriya Vidyalaya, Chanur, Siwan	2021 – 2022
High School , Mahaviri Saraswati Vidya Mandir, Siwan	2019 – 2020

Projects

WanderNest | Node.js, Express.js, MongoDB, EJS, Passport.js [GitHub](#) | [Live Demo](#)

- Developed a full-stack travel booking platform using **Node.js, Express.js, MongoDB, EJS**, and Bootstrap, following MVC architecture to build scalable backend services and responsive user interfaces.
- Engineered secure authentication using **Passport.js**, Express Sessions, and Resend, implementing 6-digit OTP email verification, password reset, and session-based authentication.
- Developed a reservation system with check-in/check-out date validation, guest management, booking conflict prevention, and dynamic price calculation.
- Integrated **Mapbox Geocoding API** for interactive maps, **Cloudinary** for cloud image management, and a Gemini API-powered AI Travel Assistant for personalized itineraries.

CAMPUS Marketplace | MongoDB, Express.js, React.js, Node.js, Socket.io [GitHub](#) | [Live Demo](#)

- Developed a secure peer-to-peer campus marketplace for students to trade books, notes, and electronics, featuring domain-restricted registration (@gla.ac.in) and email verification powered by **Nodemailer**.
- Engineered a real-time chat interface and live notification system using **Socket.io** rooms, facilitating seamless, instant communication between buyers and sellers.
- Built an **item-for-item barter system** allowing students to trade items without money, automatically updating item availability once a trade is accepted.
- Designed a **privacy-first** feature that hides female students' phone numbers on the backend, along with a rating and review system for completed trades.

Achievements

- Secured **3rd Position** in the GLA University Summer Project Competition (S3) for developing a Weather-Based Music Recommendation System.
- Selected for the Prototype Round of the ET GenAI Hackathon for developing the Smart Garbage Alert Management System.
- Solved **150+** DSA problems on LeetCode covering arrays, strings, binary search, stacks, and SQL.

Technical Skills

Languages: Java, JavaScript, Python, SQL

Frontend: HTML5, CSS3, React.js, EJS, Bootstrap

Backend: Node.js, Express.js, REST APIs, Passport.js, Session Management

Database: MongoDB, Mongoose

Tools & Platforms: Git, GitHub, Cloudinary, Netlify, Render

Core Concepts: DSA, OOPs, DBMS, MVC Architecture

Certifications

- Delta (Full Stack Web Development) – Apna College | [Certificate](#)
- Gen AI Course – GLA University × Coding Blocks (2025) | [Certificate](#)
